

ECPRE 491 - sdmay19-40

Weekly Report 10

11/29/2018 - 12/6/2018

Client: IBM Call For Code

Faculty Advisor: Diane Rover

Team Members:

David Boschwitz - Team Lead

Caleb Nash - Lead Frontend, Maps Guy

Justin Kaufer - Research & QA

Austin Keen - Designer & User Experience Lead

Bobby Schedler - Lead Backend

Logan Fladung - Subject Matter Expert & Graphics

Past Week Accomplishments:

Caleb Nash - Worked Extensively on Design Document and Project Plan

This week I worked on finishing up the design document, project plan, and final project. We all had to get together and flush things out. Not much else to report.

David Boschwitz - Finalize Documentation for the semester

Put a lot of effort in to working with each team member to finalize and document the work they have done this semester. I worked with each team member to make sure they were on the same page for the presentation. I also completed my contributions to all of the documentation.

Robert Schedler - Worked on final papers and presentation

Worked on the presentation and the final paper, to make sure they were adequate for presentation.

Austin Keen - Finish Design Document and Project Plan, Finish XAML Tutorial

This week I spent my time finishing up the project plan and design document, as well as finishing the XAML tutorial to prepare for next semester. We decided to focus most of our time on the design document and project plan, because we weren't getting the grades we desired, and wanted to focus on those major aspects of this project. Doing this helped us better finish up planning our project, therefore in a technical sense, was beneficial. As for the work that made the most technical progress, I finished up my XAML tutorials, which will set me up really well to begin building the applications UI.

This weekly report, being the final one of the semester, I wanted to best prepare myself for the start of next semester, and am very comfortable with my ability to start building in XAML.

Logan Fladung - Finish Design Doc, Project Plan, and Presentation

This week I finished my parts for the end the semester. I did the parts assigned to me and work with the team to ensure that everything was up to our standards. I haven't been working the the News feature due to it being dead/finals week.

Justin Kaufer - Finish Documentation and Presentation

This week I focused only on working on the project plan and design document. We had to create final versions to turn in for the end of the year. We also had to create our presentation for our project. I focused on the testing plan since I am the test lead. Along with the documentation I planned out my work for over break and then for picking back up second semester when we come back.

Pending Issues

There are no pending issues

Individual Contributions

Team Member	Contribution	Weekly Hours	Total Hours
Caleb Nash	Location App	11	48
Justin Kaufer	User feedback model Maps framework	5	38
David Boschwitz	Finalizing Documentation	6	49
Logan Fladung	Finish presentation and documents	5	40
Austin Keen	Finish XAML Tutorial Finish Design Document and Project Plan	5	41
Robert Schedler	Mesh Networking	5	38

Plans for Coming Week

David Boschwitz - Some rest + ramp up for next semester

Over break, I will take some time off to relax. I will also work on finalizing the user research we have in progress (mostly signing up for Red Cross volunteer connection). I will work to ramp up on core development, and hopefully have a good place with the team so we can begin development on week 2 of semester 2.

Caleb Nash - Some development research over break

Over break I plan on working on this project slightly. Not too much though. Plan on preparing for next semester which will be development-heavy.

Robert Schedler - development over break

I plan to get a good start on the back-end over break. I would like to design a interface that every team member can easily understand and implement.

Austin Keen - Finals Week and Drawing Out UI in VS

I plan on finishing off the semester strong, and focusing on preparing myself for a development-heavy final semester. I plan on making designs on the application over break and trying out what I have learned.

Logan Fladung- News feature

I will begin working on the News feature more in-depth over winter break.

Justin Kaufer -

Since next week is finals week I do not plan on working on the project. I will however make some progress over winter break.
